RESUME

Computer Engineering graduate specializing in Embedded Systems and IoT, with hands-on experience in artificial intelligence, web and mobile development, and intelligent systems. Passionate about technology, innovation, and continuous learning, I am seeking a full-time opportunity where I can apply my technical skills, contribute to innovative projects, and continue growing as a software and AI engineer.

EDUCATION

Bachelor's Degree in Computer Engineering 2023 - 2026

Higher Institute of Computer Science and Communication Technologies of Sousse

Mathematics Baccalaureate 2023

Teboulba High School

PROFESSIONAL EXPERIENCE

Freelance | Full-Stack Web Developer August 2026

MILORA: E-COMMERCE WEB PLATFORM

Developed a complete e-commerce web platform with a customer storefront and an administration dashboard.

- Developed the frontend customer interface and administration dashboard.
- Implemented product, category, and order management features.
- Built RESTful APIs and connected the application to MongoDB Atlas.
- Implemented customer authentication and account management.
- Added real-time admin notifications using Socket.io.
- Developed a customer contact and support management system.

Technologies: React, Node.js, Express.js, MongoDB, Socket.io, REST APIs, Git, GitHub

SOTUPUB | Mobile Application Developer January - May 2026

ANTISAMARSAR: SMART REAL ESTATE MOBILE APPLICATION

Designed and developed AntiSamsar, a smart real estate mobile application featuring property search, geolocation, real-time chat, favorites management, and AI-based recommendations.

- Built both frontend and backend components.
- Implemented RESTful APIs.
- Integrated machine learning techniques to deliver personalized property recommendations.
- Improved user engagement through intelligent recommendation features.

Technologies: Flutter, NestJS, MongoDB

SYNC | Mobile Application Developer July - August 2025

Developed a complete mobile application for monitoring and training an artificial hand.

- Integrated personalized exercise series.
- Implemented user progress monitoring.
- Developed a role-based system for users, physiotherapists, and administrators.

Technologies: Flutter, Firebase

Tunisie Telecom | Technical Internship

June - July 2025

Regional Directorate of Monastir, Tunisia

Gained practical experience in a professional environment, supporting technical and administrative tasks.

ACADEMIC PROJECTS

SmartLift Access - Prototype

2025 - 2026

Developed SmartLift Access, a smart elevator access control system for residential buildings. The project provides secure access for residents and visitors through intelligent authentication, improving security, convenience, and access management.

Technologies: Android Studio, Arduino IDE, Firebase, ESP32-CAM, Wokwi

Portfolio - Website

2025 - 2026

Developed a personal portfolio website to showcase skills, projects, and experience.

Technologies: HTML, CSS, JavaScript

University Events and Clubs Management - Website

2024 - 2025

Developed a web platform to manage and promote university clubs, enhancing communication and student engagement at ISITCOM.

Technologies: HTML, CSS, JavaScript, PHP, SQL

Tap the Frog - App

2024 - 2025

Developed a fast-paced arcade game where players tap randomly appearing frogs to test and improve reaction speed.

Technologies: Java, XML, SQLite

LANGUAGES

Arabic: Native Speaker | French: Intermediate | English: Intermediate

SKILLS

Programming Languages: C, Python, Java, Dart, JavaScript, PHP, HTML, CSS, NestJS

Embedded Systems & IoT: ESP32, Arduino, VHDL

Mobile Development: Flutter, Android

Databases: MySQL, Firebase, MongoDB

Tools & Platforms: Git, GitHub, Socket.io, Kali Linux, Ubuntu

INTERESTS

Chess | Tennis | Gaming
